

Product information chemical risks

uvex profabutyl B-05R//60949

Description

Manufactured from 100% butyl rubber, this glove offers protection against esters and ketones in particular. Butyl rubber has a high resistance to polar substances such as esters, ketones, aldehydes, amines and saturated salt solutions plus acids and alkalis (diluted to concentrated). Butyl is not resistant to oil, grease, aliphatic and aromatic hydrocarbons or chlorinated hydrocarbons.

Characteristics

- Impermeable to water vapour, gases and toxic substances
- Meets the requirements of EN 16350: 2014
- flexible with good grip, even at low temperatures

Applications

- Chemical industry
